

# ALLOY REPAIR MASK

A flexible solution for the masking of tyres during the re-spraying of wheel alloys.

**PART NO:**

**SIZE:**

**UNITS:**

0980.5300

140cm x 140cm

20

## FEATURES

*Flexible solution for the masking of tyres during the re-spraying of wheel alloys.*

- Elastic centre piece
- Temperature resistant
- Maximum inner diameter: 22"

## BENEFITS

- Paint absorbent
- Flexible for all sizes of wheel alloy
- Saves time & material compared to traditional processes
- Simple & easy to use

Alloy Repair Mask

## HOW TO USE THIS PRODUCT:

1.

1. Remove wheel from the vehicle & deflate the tyre.

2.

2. Before masking the wheel, clean the inner rim ensuring it's free from dirt and grease.

3.

3. Apply the product by placing the elasticated band around the rim, ensuring the treated side of the film is facing upwards.

4.

4. When you have positioned the product into place, carefully flip the wheel over so the alloy is facing the ground, draw the corners of the product together & tape down.

5.

5. Once the product is taut, ensure the film is firmly in position but not so taut the elasticated band is coming away from the rim.

6.

6. To complete the masking process, flip the wheel over, checking that the elasticated band is still creating a seal and then paint.
